DETAILED ACTION

Specification

Applicant should note the disposition of the application listed on page 1.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Parsons in view of Rich. Parsons discloses in figure 6 the basic pill crusher pouch except for the use of a cup-like bottom for ease of pouring. Rich discloses a similar article including several embodiments in which a pill crusher pouch has a cup-like bottom e.g. figures 13 and 18. In order to more easily pour the crushed powder it would have been obvious for one of ordinary skill in the art to modify Parsons by using a cup shaped bottom, taught to be desirable by Rich. Note that using a single piece of material to form the pouch versus several pieces of material would have been an obvious design choice based on several factors such as material being used to form the pouch and desired strength of the pouch.
